

TRAFFIC CONTROL BOX TEMPLATE

This is a flat template of the traffic control boxes showing the sides of the boxes. You may use this template when designing your wrap, but it is not required. Your design must be proportionally correct in order to fit on the control box. Each control box is 44 in. wide, 56 in. high, and 26.75 in. deep. Each box has a small access panel on one side in the middle (dimensions shown below). View photos of the boxes in the RFP.
