

TRAFFIC CONTROL BOX TEMPLATE

This is a flat template of the traffic control box showing each side of the box. You may use this template when designing your wrap, but it is not required. Your design must be proportionally suited to fit on the control box. Each box is approximately 44 in. wide, 27.5 in. deep, and 58 in. high. The light blue outline represents a “safe area” around the perimeter of the box; elements outside the blue outline may be subject to minimal cropping as there are slight variations in the box sizes.
